# Full Command Surrounds You at a Glance

# **Color Liquid Crystal Multi-information Display**

Attractively designed color liquid crystal multi-information display provides a useful readout of vehicle, trip and outside temperature. With a large, 3.3-inch size for improved visibility, this display makes it easy for drivers to stay informed.

# \*Illuminated for explanation purpose.

# **INVECS-III CVT with 6-step Sports Mode**

The 2.0-liter engine is teamed with the new INVECS-III (Intelligent & Innovative Vehicle Electronic Control System) CVT (Continuously Variable Transmission) featuring Sports Mode, ideally tuned to deliver effortless acceleration from any speed. In addition, the INVECS-III CVT provides improved fuel efficiency, while Sports Mode offers all the sporty control of manual shifting without the hassle of a clutch.

# **Link System**

The Link system connects external devices with the vehicle's systems. Devices connected to the USB port or via Bluetooth®, such as mobile phones or MP3 players, may be controlled via the on-board switch or by voice command.

### **USB Port**

The USB port allows you to connect your portable media player and enjoy your full music library in premium quality.

# **Bluetooth® Hands-free Kit**

Keep in touch while keeping safely in control with the hands-free kit. Link your Bluetooth®-compatible mobile phone, and thevoice-activated dialer lets you make calls while holding the wheel.

Note: The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by MITSUBISHI MOTORS CORPORATION is under licenses.

### **Panoramic Glass Roof with Interior LED Illumination**

The panoramic glass roof adds a new dimension to the drive, allowing you and your passengers to enjoy the view from every direction. Retracting the sunshade reveals a full-size glass roof panel extending over the front and rear seats. At night, the roof is attractively illuminated with LED lamps.

# 9-speaker Rockford Fosgate® Premium Sound System

This system features high-quality sound and bass response with a powerful punch. The speakers are fitted precisely into the door panels, turning them into frequency enhancing speaker cabinets. In addition, sound levels are automatically adjusted to suit the vehicle's speed.

# **Engine Switch + Keyless Operation System**

The Keyless Operation System lets you activate the ignition just by pressing the button located near the center of the dash panel with the brake depressed and the shift in parking position for CVT. Once you've arrived, one more push shuts the engine off.

# Paddle Shifters & Cruise Control

Mounted within easy reach, the paddle shifters allow you to enjoy sporty control while keeping both hands safely on the wheel. Shifting is quick and easy, with up- and down-shifts requiring just a simple press once ASX is in 'D' mode. For added convenience, the current gear position is clearly displayed on the multi-information display. Paddle shifters can also be equipped with cruise control, for greater performance

# **Electronically Controlled 4WD**

Using one centrally located button, the system permits freely switching between 3 drive modes depending on driving condition or environment. Easily accessible on the floor console, the drive-mode selector button can quickly change the ASX's drive mode from fuel-efficient 2WD, to 4WD Lock Mode for mastering even demanding off-road or weather conditions.

Enables economical performance approaching that of a normal front-engine front-wheel-drive car.

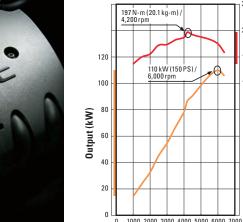

### 4WD Auto Mode:

The "4WD Auto" mode automatically distributes the right amount of torque to all wheels depending on the driving condition. It maintains stability in strong wind, on highways and slippery roads.

### 4WD Lock Mode:

"4WD Lock" mode for steep hills, slippery or rough roads, and when getting out of mud or snow

Engine Speed (rpm)

# **MIVEC Engine**

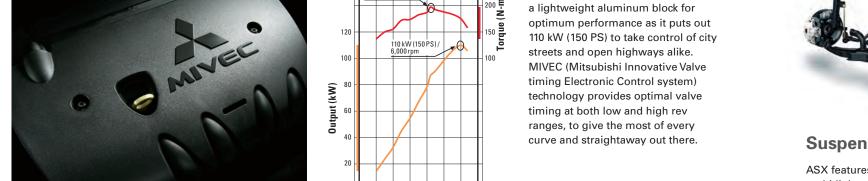

ASX's 2.0-liter powerhouse uses a lightweight aluminum block for streets and open highways alike. MIVEC (Mitsubishi Innovative Valve timing Electronic Control system) technology provides optimal valve timing at both low and high rev ranges, to give the most of every curve and straightaway out there.

### Suspensions

ASX features MacPherson strut front and multi-link rear suspensions for smooth handling over rough roads. Shock absorbers and stabilizers are tuned for sporty, comfortable performance.

# **High Hip Point and Good Visibility**

ASX provides a surprisingly elevated seat position that, with the sloping hood design, gives a better view of the road for easier maneuvering and greater safety. The raised hip point also allows for smoother entrances and exits, and greater comfort.

2.0 DOHC MIVEC

# **Room to Choose**

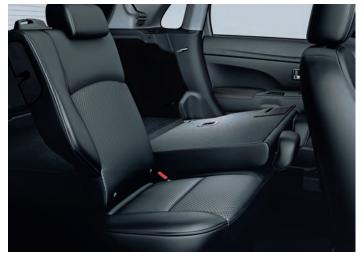

# **Cargo Capacity**

No matter where you're headed, ASX lets you carry whatever you need for when you get there, with up to 358 liters of available cargo capacity with five passengers. The tailgate is wide enough to provide ample space for even the bulkiest items, and the low floor height makes it convenient to move heavy cargo in and out.

1,350 mm maximum width of cargo area. 1,510 mm maximum length with rear seats folded down. Measured by Mitsubishi Motors Corporation.

# Full-flat Rear Seat / 60:40 Split Foldable Seatback

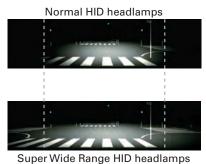

To carry even larger items, the rear seat can be folded down completely flat to create an expansive cargo space. The 60:40 split rear seat can also be partially folded down, giving you the room to carry bicycles or other extra-long items, while still having rear seating available.

# **Ready for Anything**

# **Super Wide Range HID Headlamps**

What you can't see, can hurt you. To take more of the road out of the shadows, ASX features Super Wide Range HID (High Intensity Discharge) headlamps. When activated, the headlamp clusters send out broader beams of light, illuminating a much wider section of the road ahead.

7-Airbag System

So that you and your passengers can be safer in the event of a collision, ASX is equipped with a 7-airbag system to provide increased safety to every seat. The front seat occupants are protected by front airbags, plus an additional knee airbag for the driver to help protect the legs in a forward collision. In a side collision, the front occupants are protected by side airbags and occupants in both rows are protected by curtain airbags extending along the sides.

Note: 7-Airbag System is optional. Equipment may vary from the image shown. Airbags are part of a Supplemental Restraint System (SRS). To decrease the risk of injury from a deploying airbag, always wear your seat belt, sit upright in the middle of the seat and do not lean against the door. Always place children 12 and under in the rear seat and use appropriate child restraints. Never place a rear-facing infant restraint in the front seat. Please see the owner's manual and the instructions provided with your child restraint for additional information.

# **Active Stability Control (ASC)**

### **Stability Control Function**

ASC uses onboard sensors to analyze the vehicle's motion and identify lateral wheel slippage. By governing engine output and controlling braking to the appropriate wheels, ASC helps maintain stability and traction control.

Lateral rear-wheel slippage Braking force is applied to the outer front wheel

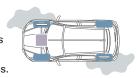

Lateral front-wheel slippage Braking force is applied

to the inner rear wheel to

### **Traction Control Function (TCL)**

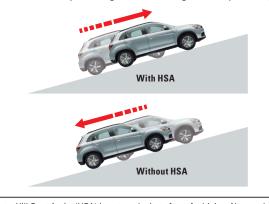

When wheel spin is detected, engine output is governed and braking force is applied to the spinning wheels to prevent driving torque loss.

Note: The control capabilities of ASC/TCL are supplemental only. Please drive safely and never rely solely on these functions while driving. Be sure to use the same specified type and size of tires on all 4 wheels. Do not install any aftermarket limited slip differential on your vehicle. Please see the owner's manual for additional information.

# Hill Start Assist (HSA)

HSA prevents the vehicle from rollingbackward by automatically braking when starting on an uphill slope.

Note: Hill Start Assist (HSA) is not a substitute for safe driving. Never rely solely on this function while driving on steep roads. Your vehicle may move backwards if the brake pedal is heavily loaded, or if road is very steep or slippery. This function is not designed to keep the vehicle stopped in place on uphill slopes for more than 2 seconds. Do not rely on this function to maintain a stopped position as an alternative to depressing the brake pedal. Please see the owner's manual for additional informa

<sup>■:</sup> Standard □: Optional ☆: Package option —: Not available \*\*: ABS can help a driver prevent unsafe situations while braking, but is never a substitute for safe driving. ABS does not always reduce stopping distances. Stopping distance can be influenced by many factors including road surface conditions and friction between the tires and the road surface. \*\*2: Auxiliary audio jack and USB port cannot be combined.
